Thank you for choosing Atlantis Aquarium Sales and Service as your aquarium maintenance provider.

So you know what to expect from our service, please read the following:

- Service will be done two times a month. During holiday and vacation times, the service interval may vary.
- Your monthly maintenance fee will be _____. This fee includes all of your supplies, food, and replacement of sick or dead fish that were purchased from us.
- Keep in mind that the main causes of excessive algae growth in an aquarium are too much light and overfeeding. Either one by itself will cause excessive algae. If your tank gets a lot of sunlight or if the room lights are on 24 hours a day, algae growth in your tank will always be above normal.
- An automatic feeder is on your tank and will take care of feeding. We will replace batteries and feeder if either stops working at no cost to you.
- Your light should be on only during business hours, preferably no more than ten hours per day. We will add a timer or adjust the existing one.
- If a fish dies, please remove it from the tank with your net. If it is inaccessible it can be left alone. The body will deteriorate within a day or two and will not affect the water quality. If a dead fish is inaccessible but is very visible, please call us to remove it.
- If a fish is sick, there is usually nothing that can be done to help it. Either let it die naturally or call us to remove it.
- One sick or dead fish is not a cause for concern. If several fish die within a short period of time, there may be a problem and we should be notified.
- The fish currently in your tank are guaranteed. Only new fish purchased from Atlantis Aquarium S/S will be guaranteed. If a fish from another source is added to your tank, our fish guarantee will be void for 30 days from the time we become aware of it.

If you have any questions or concerns, please call 404-277-3743.

Thanks again, Peter
